PROJECTS

- **Human Body Estimation** [Source Code](#)
AICTE Intern Project Dec 2024 - Jan 2025
 - This project leverages **Open CV**, **MediaPipe**, **TensorFlow**, and **Streamlit** to detect and track human body keypoints (like shoulders, elbows, and knees) from images and live video.
 - It also integrates basic motion detection for added interactivity.
 - Designed to showcase how AI and computer vision can interpret human movement — opening doors to applications like fitness tracking, sports analysis, and gesture-based interfaces.
- **Smart Resume Generator** [Source Code](#)
Personal Project Jan 2025 - Feb 2025
 - Developed a Smart Resume Generator that dynamically creates professional resumes based on user input using structured templates.
 - Integrated features like section customization, automatic formatting, and export to PDF.
 - Implemented using **HTML**, **CSS**, **JavaScript**, **React.js**, and PDF generation libraries.
- **Expense Tracker** [Source Code](#)
Mr. Namit Khanduja (GK(DU) Haridwar) July 2025 - Aug 2025
 - Built an Expense Tracker web application to monitor and categorize personal spending, offering insights through visual analytics.
 - Included features such as transaction history, monthly budget overview, and interactive data visualizations.
 - Built using **Python**, **Pandas**, **NumPy**, **Matplotlib**, with emphasis on user-friendly interface and data insights.
